Well as you can see we have updated our website! We wanted to highlight some of the games we play the most like Gears of War, Halo 2, and some of the PC games to. Dont forget we have Counterstrike Source and World of Warcraft Burning Crusade on PC.

Some of the new things we plan on adding to the site include the following:

- User Profile Pages
- Create your own Clan Pages
- Forum
- Re- add the gallery

Let us know what you would like to see the most and I will add that first.

You need to create a new username and password with the new site. The lockin is filling up fast too,so be quick

Over and out.
